SUMMARY

Management Information Systems graduate and 1st Prize winner at the LowCode Challenge 2025, passionate about building user-centric digital products through business analysis. Experienced in requirement elicitation, BRD/SRS documentation, UI/UX prototyping, and Agile collaboration. Seeking to begin my career as a Business Analyst where I can bridge business needs and technology while continuously developing domain expertise, analytical thinking, and stakeholder management skills to deliver impactful digital solutions.

SKILLS

- **Business Analyst Core:** Elicitation, BPMN, UML (Use Case/Activity/Sequence), User Stories, UAT, MoSCoW Prioritization
- **UI/UX & Prototyping:** Figma, Axure RP, Figma make, v0, Lovable, Balsamiq
- **Data & Reporting:** SQL (Advanced), Power BI, MS Excel (Pivot, VLOOKUP, Dashboard)
- **Technical & Collaboration:** Postman (API), Confluence, Jira, Notion, Draw.io, Lucidchart, Visio
- **AI-Assisted Tools:** ChatGPT, Claude, Microsoft Copilot, Perplexity (Prompt Engineering, Market Research, Documentation Assistance)
- **Project Management:** Jira, Agile/Scrum, Waterfall, SDLC
- **Soft skills:** Analytical Thinking, Problem Solving, Cross-functional Communication
- **Languages:** Vietnamese (Native), English (B1 – Intermediate, TOEIC 720/990)

PROFESSIONAL EXPERIENCE

GO4AI TECHNOLOGY TRAINING

Remote

Cat Speak - Business Analyst

May.2026 – Present

Domain: Edtech **Team size:** 6

- Requirement elicitation for the entire Cat Speak ecosystem—covering User Onboarding, Teacher/Host Portal (Room Management 1-1 & 2-5), and AI Speaking Chatbot modules.
- Authored core BA artifacts (BRDs, User Flows, User Stories with clear Acceptance Criteria) for User, Teacher, and AI interaction journeys, ensuring seamless functional integration between human-led and AI-assisted learning.
- Conducted EdTech competitive benchmarks to propose 3+ workflow enhancements for student-teacher room matching, host management, and personalized AI speaking practice routes.
- Orchestrated User Acceptance Testing (UAT) on the Staging environment across User, Teacher, and AI Speaking flows—validating release candidates, consolidating cross-team feedback, and resolving defects prior to Production deployment, which reduced post-release bugs by 20%.
- Analyzed operational and user engagement metrics via Advanced Excel/Google Sheets to optimize learning journeys and host operations, cutting product iteration cycles by 15%.

BRAVO SOFTWARE JSC

Ha Noi, Viet Nam

Functional Consultant

Jan.2026 – May. 2026

- Elicited and documented detailed business requirements from 3+ enterprise clients across accounting, warehouse, purchasing, production, and HR-payroll modules, securing 100% timely sign-off on BRDs.
- Configured BRAVO ERP system components (catalogs, parameters, user authorization, and document circulation), optimizing core operational workflows by 20% to match each client's specific business model.
- Delivered tailored training sessions for 20+ end-users per project, accelerating system adoption and reducing post-go-live support tickets by 40%.
- Collaborated directly with B2B client departments (accounting, warehouse, HR) to troubleshoot system deployment issues, minimizing data processing errors by 35% during the UAT and operational phases.

VIET TRI DAO DIGITAL TECHNOLOGY CO., LTD.

SportHub Platform - Business Analyst

Oct.2025 – Jan. 2026

Domain: Booking, Sport **Teamsize:** 10

- Owned the requirement lifecycle to deliver high-quality BRDs, SRSs, and 80+ User Stories (Gherkin) for a high-traffic sport platform, successfully managing 4 distinct system roles.
- Led the UI/UX conceptualization by wireframing [20+] screens via Figma and architected end-to-end system behaviors using UML diagrams, reducing design misalignment by 25%.
- Formulated complex business logic (OTP, Refund matrix, Google Maps API integration) and orchestrated the final End-to-End UAT phase with zero critical bugs.

Freelance Web/App Builder

Freelance

Aug.2025 – Present

- Gathered and analyzed business needs for product validation, translating vague ideas into clear user stories and feature matrices for 3+ web/landing page projects.
- Designed interactive UI/UX wireframes and high-fidelity prototypes using Figma, cutting down client feedback iteration cycles by 20% prior to development.
- Engineered responsive interfaces and managed deployment pipelines on Vercel, ensuring 100% on-time project handovers with optimized domain configuration.
- Resolved post-launch frontend and functional bugs during the stabilization phase, maintaining a 95% customer satisfaction rate for delivered platforms.

PROJECTS

Circle Bank Mobile App | [Link](#)

- Analyzed requirements for a digital onboarding mobile banking app; modeled TO-BE workflows for eKYC, account creation, and debit card issuance to reduce registration friction by 30%.
- Authored a comprehensive SRS featuring MOSCOW-prioritized requirements, strict NFRs, and detailed Use Case specifications.
- Produced high-value BA artifacts including Use Case catalogs, State Diagrams, and UI Specifications for 10+ mobile screens, saving 20% of development rework time.

EDUCATION

Thuong Mai University

Hanoi, VietNam

Bachelor of Management Information Systems. (GPA: 3.4/4.0)

2022 - 2026

Relevant Coursework: Business Analysis, IT Project Management, Database Management Systems, Systems Analysis and Design

CERTIFICATES & ACHIEVEMENTS

- 1st Prize (Overall Winner) – LowCode Challenge 2025 (Awarded 6M VND)
- HackerRank SQL Advanced | [Link](#)
- Business Analyst Foundations – LinkedIn Learning | [Link](#)
- Foundations of User Experience (UX) Design | [Link](#)
